

CUSTOM PRINTING SERVICES

There are many benefits of owning our own in-house state-of-the-art digital printing system. The greatest of those benefits, without a doubt, is our ability to print

- any image you see in this gallery or in any of our catalogs
- at any size
- on your choice of dozens of materials

Images

You may select any image from the more than 3,000 images in Paul Hundley's extensive collection. Many of the images are already shown on display or in one of the catalogs you will find throughout the gallery. Eventually the entire collection will be available in a fully searchable on-line database both here and on the internet. As of right now more than 1,000 images have been digitized, and additional images are being added to the printed catalog each week. Until the project of digitizing the entire collection is completed, feel free to ask about scenes, locations or golf courses you do not see. It's possible that your special location might be among the images still waiting to be digitized.

Print size

From small table-top frames to room-size murals, we can print to your exact needs. If you have a 10' wall on which you want to hang 3 framed prints, each with a 2" wide frame and a 3.5" window mat, arranged so that there is a 12" space on each side of the grouping and a 6" space between the frames we can output the three 17.5" wide prints needed to make that particular arrangement happen. Any single print is limited to a panel no larger than 44 inches by 27 feet, but we can print images in multiple panels and then mount them together for total print sizes limited only by your imagination - and your wall size.

Media

Giclée printing is still a young industry, and the list of available printing media is growing rapidly. The most popular choices right now are acid-free watercolor rag papers, artist canvas, Photo Glossy paper, and Photo Luster paper. These surfaces are always in stock. Additional options include indoor or outdoor banner materials, adhesive backed papers and vinyls, backlit films, or various fabrics including some silks. In most cases those surfaces will have to be special ordered. In that case a minimum purchase amount will be required to cover the higher shipping and inventory costs of special-order materials. As we said, the list of available media is growing rapidly. Talk to us about your special needs and we will do the research.

Prices and ordering

Special order prints will normally cost between \$30 and \$50 per square foot, depending on their size. (Prints already in inventory cost about \$22.50 per square foot.) Our detailed price list is available upon request. A 50% deposit is required when a custom print order is placed.
